

FOR IMMEDIATE RELEASE

Axine Water Technologies to Showcase PFAS Destruction Technology at WEFTEC 2024

Live Demo of electraCLEAR™ Technology, Technical Spotlight Presentation, and Interview Availability

Vancouver, BC, September 23, 2024 – Axine Water Technologies, a leader in industrial wastewater treatment, is excited to announce its participation in WEFTEC 2024, held from October 5-9 in New Orleans, Louisiana. Axine will showcase its electraCLEAR™ technology, which destroys organic contaminants in industrial wastewater, including difficult-to-treat PFAS chemicals.

Live Demo & Booth Information

Attendees can participate in a live demonstration of the electraCLEAR™ system at Booth #952, witnessing first-hand how Axine's innovative technology offers an energy-efficient, chemical-free solution for complete destruction of PFAS, helping industries reduce operational costs while meeting environmental regulations.

Technical Spotlight Presentation

Axine will present as part of a Technical Spotlight on Tuesday, October 8, titled "Liquid Treatment Technologies for PFAS at Water Resource Recovery Facilities" from 4:00 PM - 5:00 PM. The session will explore scalable, onsite solutions for PFAS destruction, focusing on efficiency and sustainability of systems.

Interview Opportunities

Axine's CEO, Mark Ralph, and CTO, Dr. Victor Leung, will be available for interviews to discuss the impact of Axine's technology on the industry, the future of wastewater treatment, and how Axine's solutions are helping companies move towards a sustainable future. Interested media can schedule interviews by emailing smeechan@axinewater.com or visiting Booth #952 during the event.

Event Details

Location: WEFTEC 2024, New Orleans Ernest N. Morial Convention Center

Dates: October 5-9, 2024

Booth: #952 – Innovation Pavilion

Technical Spotlight: Tuesday, October 8, 4:00 PM - 5:00 PM

About Axine Water Technologies

Axine Water Technologies specializes in electrochemical oxidation for the destruction of persistent contaminants in industrial wastewater, including PFAS. With over 150,000 hours of commercial operating experience, Axine delivers cost-effective, reliable solutions through its treatment-as-a-service model, ensuring compliance with current and future regulations.
